AI Resume Screening — Honest Experience or Keyword Strategy?

READ BEFORE WE TALK

If AI screens resumes or cover letters first, applicants may start writing differently. Instead of only asking, "Will a person understand my story?", they also ask, "Will the system find the right skills, keywords, and structure?" That creates a real tension. Adding job-related keywords can be smart preparation, but writing only for an algorithm can make a personal experience sound flat or generic. A strong application has to do both: pass the first filter and still feel specific, believable, and human when an interviewer reads it later. This kind of screening changes the meaning of "good writing." Too few keywords may hide a strong experience, but too many can make the applicant sound like everyone else.

POP QUIZ ANSWERS

1. ~~"Let's meeting at 3 p.m."~~

✓ "Let's meet at 3 p.m."

meeting은 명사예요. 동사는 meet. '회의하자'는 Let's meet 또는 Let's have a meeting이라고 해요.

2. ~~"We meeting for 3 months."~~

✓ "We've been seeing each other for three months."

be동사가 빠졌고, 계속되는 기간엔 현재완료진행(have been -ing)을 써야 자연스러워요.

3. ~~"I am preparing my career."~~

✓ "I am working on my career. / I am preparing for my next step."

career 자체를 prepare한다고 하기보다 work on 또는 prepare for a next step 이 자연스러워요.

사이트 답변 탭과 같은 순서입니다. 멤버가 막히면 먼저 Brainstorm을 보고, 그다음 Pro / Con / Neutral 중 하나를 골라 자기 말로 줄여 말하게 해주세요. 영어 문장은 그대로 외우기보다 한 문장만 가져와서 바꾸는 용도입니다.

Q1. Are you more of a 'write-it-myself' or a 'use-a-template' person when you put together your resume?

AI Resume Screening에서 내 기준, 상대/상황, 돈·시간·관계 변수를 나눠 생각합니다.

Pro · 도구로 활용

Honestly, I would use AI for the boring first draft or to organize messy thoughts. I still want the final version to sound like me, though. If I send something too polished, people who know me might feel that I am hiding behind a tool. I would check whether my own examples and judgment are still visible, not just the clean wording. I would still choose examples that a real person could ask me about later. If this happened at work, I would think about how it affects trust, not only whether it makes me look efficient. If I was already burned out, I would separate a real career plan from a temporary escape feeling.

AI 이력서 필터링에서는 AI를 최종 작성자가 아니라 보조 도구로 쓸 것 같아요. 특히 이력서에서 진짜 실력을 어떻게 보여줄지를 확인하면서 마지막 표현은 제가 직접 고쳐야 해요. 깔끔한 문장보다 제 실제 예시와 판단이 남아 있는지를 볼 것 같아요. 나중에 사람이 물어봐도 제가 설명할 수 있는 예시를 넣을 것 같아요.

Con · 내 목소리 우선

I would be careful with it, especially for anything personal or important. A clean AI sentence can save time, but it can also make me sound generic. I would rather keep a few imperfect details if they make the message feel more honest. I would check whether my own examples and judgment are still visible, not just the clean wording. I would still choose examples that a real person could ask me about later. If this happened at work, I would think about how it affects trust, not only whether it makes me look efficient. If I was already burned out, I would separate a real career plan from a temporary escape feeling.

저는 AI 이력서 필터링을 조심해서 볼 것 같아요. 결과가 너무 매끈하거나 남들과 비슷하게 들리면 오히려 신뢰를 잃을 수 있거든요. 깔끔한 문장보다 제 실제 예시와 판단이 남아 있는지를 볼 것 같아요. 나중에 사람이 물어봐도 제가 설명할 수 있는 예시를 넣을 것 같아요.

Neutral / Personal · 상황 따라

I think I would mix both. I might ask AI for structure when I feel stuck, then rewrite the examples and final wording myself. That way I get help without giving up my own voice or responsibility. I would check whether my own examples and judgment are still visible, not just the clean wording. I would still choose examples that a real person could ask me about later. If this happened at work, I would think about how it affects trust, not only whether it makes me look efficient. If I was already burned out, I would separate a real career plan from a temporary escape feeling.

AI 이력서 필터링은 섞어 쓰는 게 제일 현실적이에요. 구조는 도움을 받되 실제 이야기, 최종 표현, 책임은 사람이 가져가야 해요. 깔끔한 문장보다 제 실제 예시와 판단이 남아 있는지를 볼 것 같아요. 나중에 사람이 물어봐도 제가 설명할 수 있는 예시를 넣을 것 같아요.
