

01 SMALL TALK

Do you ever talk to AI out loud, or do you just type?

When did you last feel a little shy speaking English to a real person?

Do you use any app to practice English? How often?

02 POP QUIZ — DOES THIS SOUND NATURAL?

① ~~"AI is very convenient for work."~~

✓ "AI is really handy for work."

convenient은 교통·위치처럼 '편의'에 써요. 도구가 도움 되면 handy/useful이 자연스러워요.

② ~~"I used AI to make my report."~~

✓ "I used AI to write my report."

report는 make가 아니라 write나 put together와 어울려요. make a report는 콩글리시예요.

③ ~~"AI is developing very fast."~~

✓ "AI is advancing really fast."

develop은 사람이 '개발한다'는 뜻이에요. AI가 빠르게 변한다는 뜻이면 advancing/evolving이 자연스러워요.

AI English Practice — Safe Rehearsal or Real Conversation?

🇰🇷 BACKGROUND

AI와 영어로 말하는 연습은 창피함을 줄여줘요. 사람 앞에서는 틀릴까 봐 말이 막히는 사람도 AI 앞에서는 같은 문장을 여러 번 다시 말하고, 표현을 바꾸고, 발음을 점검해볼 수 있어요. 하지만 AI 연습만 오래 하면 실제 사람의 표정, 속도, 끼어들기, 농담 같은 것에 다시 긴장할 수도 있어요. AI는 안전한 리허설이지만, 언젠가는 사람과의 대화로 넘어가는 다리가 필요해요.

📖 READ BEFORE WE TALK

Practicing English with AI lowers the embarrassment that often blocks real speaking. With an AI partner, you can repeat the same sentence, try a different expression, ask for a correction, and make mistakes without feeling watched. That makes practice easier to start and easier to repeat. But human conversation has things AI cannot fully copy: facial reactions, interruptions, timing, jokes, and the pressure of being understood right now. AI is useful as rehearsal, especially for building confidence and vocabulary. The big question is when to move from safe practice to real conversation, where language becomes social, not just correct. At work, AI can feel like a help because it lets people draft, summarize, and learn faster. But it can also raise stress when everyone is expected to use it well. The real line is whether AI lowers pressure or quietly raises the standard for everyone.
