

01 SMALL TALK

When you feel a little down, do you talk to someone or keep it to yourself?

Do you use AI apps at night, or only for work?

When you have a problem, do you write it down or talk about it?

02 POP QUIZ — DOES THIS SOUND NATURAL?

1 ~~"AI is developing very fast."~~

✓ "AI is evolving really fast."

기술에는 *developing*보다 *evolving / advancing*이 자연스럽고, *very fast*보다 *really fast*가 더 구어적이에요.

2 ~~"AI is very convenient for work."~~

✓ "AI makes work so much easier."

*convenient*는 한국인이 유독 많이 써요. *Native*는 *handy*를 쓰거나 *makes ~ easier*로 풀어 말해요.

3 ~~"I used AI to make my report."~~

✓ "I used AI to write my report."

*make a report*는 콩글리시예요. 보고서는 *write / do / put together* 한다고 해요.

AI · MAIN DISCUSSION

AI as a Friend — Comforting, Useful, or Too Much?

🇰🇷 BACKGROUND

AI가 친구처럼 대화해주는 기능은 외로울 때 편하고 유용하게 느껴질 수 있어요. 늦은 밤에도 답해주고, 판단하지 않고, 내 말을 정리해주기 때문이에요. 하지만 편안함이 커질수록 실제 사람과 나누어야 할 감정까지 AI에게만 기대게 되는 건 아닌지 생각해볼 필요가 있어요. AI 친구는 감정을 정리하는 도구가 될 수 있지만, 관계의 책임과 상호성은 사람 사이에서만 생겨요.

📖 READ BEFORE WE TALK

An AI friend can feel comforting because it is always available, patient, and nonjudgmental. It can help people organize thoughts, practice conversations, or feel less alone for a moment. That usefulness is real. Still, friendship is not only about being heard. It also includes shared history, responsibility, conflict, repair, and the fact that another person has needs too. If AI becomes the only place where someone feels safe emotionally, it may make real relationships harder to enter. The question is not whether AI companionship is good or bad. It is what role it should play next to human connection.
