

01 SMALL TALK

Do you like apps that give you a score right away, like a fitness or language app?

When was the last time someone gave you feedback? Did it feel nice or a bit stressful?

When you try something new, do you want quick tips right away, or do you enjoy it first?

02 POP QUIZ — DOES THIS SOUND NATURAL?

① ~~"I used AI to make my report."~~

✓ "I used AI to write my report."

보고서엔 make보다 write가 자연스러워요. make a report는 콩글리시처럼 들려요.

② ~~"AI is very convenient for work."~~

✓ "AI is really handy for work."

틀린 건 아니지만 convenient는 교과서적이에요. 일상 대화에선 handy가 훨씬 자연스러워요.

③ ~~"AI is developing very fast."~~

✓ "AI is evolving really fast."

기술이 발전할 땐 develop보다 evolve가 자연스럽고, 구어에선 very보다 really를 더 써요.

03 오늘의 워업

각 질문에 A 또는 B 손가락으로 표시. 마음에 드는 거 하나만 짧게 이유.

WARM-UP

Quick Choice (5분)

1 See your score right after you speak (A), or only at the end (B)?

2 Feedback as a number score (A), or as 'try this next' advice (B)?

3 A low score makes you practice more (A), or makes you nervous (B)?

4 In speaking, confidence comes first (A), or no mistakes comes first (B)?

AI · MAIN DISCUSSION

Instant Speaking Scores — Helpful Feedback or Too Much Pressure?

BACKGROUND

AI가 발음, 유창성, 문장 정확도를 바로 점수로 보여주면 동기부여가 될 수도 있고 부담이 될 수도 있어요. 숫자는 내 실력을 눈에 보이게 만들어서 연습 방향을 잡기 쉽지만, 낮은 점수가 계속 보이면 영어를 더 말하기 싫어질 수도 있죠. 특히 말하기는 자신감이 중요한데 점수가 너무 앞에 오면 대화보다 평가처럼 느껴질 수 있어요. 좋은 피드백은 점수보다 다음에 무엇을 고치면 되는지 알려줄 때 도움이 돼요.

READ BEFORE WE TALK

Instant speaking scores can be motivating because they make progress visible. A number for pronunciation, fluency, or accuracy gives learners a clear target and can turn practice into a small challenge. But scores can also make speaking feel like an exam. If the number is low or changes a lot, learners may feel more nervous instead of more confident. Speaking a language is not only about accuracy; it is also about rhythm, courage, and connection. The most helpful feedback explains what to improve next, not just how good or bad the attempt was. A score should support practice, not replace communication. AI is no longer a distant technology. It now appears in messages, studying, work, and small daily decisions. The key line is between help and dependence.

WORDS YOU MIGHT NEED

right away — 바로, 즉시

a double-edged sword — 양날의 검

draw the line — 선을 긋다

lean on it too much — 너무 의존하다

take it with a grain of salt — 적당히 걸러 듣다

TRY THESE PHRASES

Honestly, a score would push me — but only if it goes up.

It depends on my mood, but usually a number makes me want to try harder.

The thing is, one bad score can make you scared to open your mouth.

Looking back, a low number once made me speak way less for a week.

EASY ENTRY

- 1 Are you more of a check-every-score person or a just-keep-going person when you use a learning app?
- 2 When was the last time an app gave you a score on your pronunciation or speaking — which app, and how did it feel?
- 3 Quick — if you had to pick: pronunciation, fluency, or sentence accuracy — which one would you most want AI to score for you?
- 4 On a scale of 1 to 5, how often do you record yourself speaking English just to hear how you actually sound?

MAIN DISCUSSION

Q1. Would instant speaking scores motivate you, or make you more nervous?

↳ Honestly, a score would push me — but only if it goes up.

↳ It depends on my mood, but usually a number makes me want to try harder.

Q2. Can a low score make someone speak less instead of more?

↳ The thing is, one bad score can make you scared to open your mouth.

↳ Looking back, a low number once made me speak way less for a week.

Q3. What helps you more — a number, or a comment that tells you what to fix next?

↳ I'd say a comment helps more because it tells me what to fix.

↳ Compared to a number, advice feels more useful for my next try.

Q4. Should language apps hide your score until practice is finished?

↳ The way I see it, hiding the score lets me focus on talking.

↳ What helps me decide is whether the score breaks my concentration or not.

Q5. Where do you draw the line between getting help from AI and depending on it too much?

↳ I lean more toward using AI for small checks, not for thinking.

↳ When I think about it, the line is when I stop trying on my own.
