

01 SMALL TALK

When you find a new café or restaurant, do you usually find it online or hear about it from a friend?

Do you use Instagram more, or an app like X (Twitter)?

When was the last time you tried something new because you saw it online?

02 POP QUIZ — DOES THIS SOUND NATURAL?

① ~~"I uploaded a picture in Instagram."~~

✓ "I posted a picture on Instagram."

플랫폼 앞에는 in이 아니라 on을 쓰고, upload보다 post가 훨씬 자연스러워요.

② ~~"The video got many views so it is a big issue."~~

✓ "The video got a lot of views, so it went viral."

many views보다 a lot of views가 자연스럽고, '화제가 됐다'는 go viral / blow up으로 표현해요.

③ ~~"I am addicted to my phone too much."~~

✓ "I'm addicted to my phone."

addicted에 이미 '지나치게'라는 뜻이 있어서 too much는 굳이 빼주세요.

03 오늘의 워업

각 질문에 A 또는 B 손가락으로 표시. 마음에 드는 거 하나만 짧게 이유.

WARM-UP

Quick Choice (5분)

1 Where do you see a new trend first: A) X or B) Instagram?

2 For a hot place or good restaurant, you trust more: A) Instagram photos or B) a friend's text?

3 In your friend group, you are usually: A) the first to know or B) the one who follows late?

4 More fun to scroll for an hour: A) memes or B) hot place reels?

Trend Sources — X for Memes or Instagram for Hot Places?

BACKGROUND

요즘 유행을 어디서 먼저 보느냐는 사람마다 꽤 달라요. 밈은 X에서 빨리 돌고, 핫플레이나 맛집은 인스타에서 더 잘 보인다고 느끼는 사람도 있어요. 같은 인터넷을 쓰는데도 알고리즘이 다르면 서로 전혀 다른 유행을 보고 살 수 있죠. 그래서 친구들 사이에서 누가 먼저 알고, 누가 늦게 따라오는지가 장난처럼 이야기되기도 해요. 중요한 건 빠른 정보보다 내 생활에 실제로 들어오는 유행이 어디서 시작되는지예요.

READ BEFORE WE TALK

People often talk as if everyone sees the same internet, but algorithms make trend worlds very different. One person may find memes first on X, while another discovers restaurants, fashion, or cafés through Instagram. A trend can feel obvious to one group and completely new to another. That creates funny moments in group chats: someone sends a meme too late, someone knows a place before it becomes crowded, and someone has no idea what everyone is laughing about. The platform is not only a tool. It shapes what people notice, how fast they react, and which trends actually enter their offline life. Meme timing matters too, because humor online gets old quickly. Sharing too early can feel niche, sharing at the right moment can create instant connection, and sharing too late can make you look out of sync.

WORDS YOU MIGHT NEED

go viral — 대박 나다, 확 퍼지다

doom-scrolling — 끝없이 피드 내리기

FOMO — 놓칠까 봐 불안한 마음

out of the loop — 흐름에서 소외된

a step ahead — 한 발 앞선

word of mouth — 입소문

TRY THESE PHRASES

Most of the time, I notice trends first on __ because __.

It depends on the topic, but usually __ shows me what's new before anyone else does.

Oh, definitely — there was this one time when everyone already knew __ and I __.

Looking back, I once felt totally lost about __, so I just __.

EASY ENTRY

- 1 Are you more of a meme-saver on X or a hot-place-saver on Instagram?
- 2 When was the last time you sent a friend a meme or a place you found on an app?
- 3 Quick — if you had to delete one app today: X, Instagram, or YouTube?
- 4 On a scale of 1 to 5, how often do you screenshot or save a place you saw on Instagram?

MAIN DISCUSSION

Q1. Where do you usually notice trends first — Instagram, X, YouTube, or your friends? Why?

Most of the time, I notice trends first on __ because __.

It depends on the topic, but usually __ shows me what's new before anyone else does.

Q2. Have you ever felt late to a trend that everyone else already knew? What happened?

Oh, definitely — there was this one time when everyone already knew __ and I __.

Looking back, I once felt totally lost about __, so I just __.

Q3. Do you trust your feed to show what is really popular, or is it just a bubble made for you?

Honestly, I mostly trust my feed — but sometimes __.

The way I see it, my feed is kind of a bubble because __.

Q4. Which app feels best for finding places to go in Busan — Instagram, Naver, or YouTube? Why?

For finding places in Busan, I'd go with __ because __.

It really comes down to __, so I usually open __ first.

Q5. Is being fast with trends actually useful, or is it just fun? What do you think?

I'd say being fast with trends is actually useful because __.

When I think about it, it's a bit of both — __, but also __.
