

01 SMALL TALK

Do you use AI more for work, or just for fun?

When was the last time you used an AI app?

What app do you use the most these days?

02 POP QUIZ — DOES THIS SOUND NATURAL?

1 ~~"AI is developing very fast."~~

✓ "AI is evolving really fast."

회화에선 'very/developing'보다 'really/evolving'이 더 입에 붙어요.

2 ~~"AI is very convenient for work."~~

✓ "AI is really handy for work."

도구가 편할 땐 convenient보다 handy나 'makes ~ easier'가 자연스러워요.

3 ~~"I used AI to make my report."~~

✓ "I used AI to write my report."

보고서·글은 make가 아니라 write를 써요.

AI in Real Life — Helpful Tool or Too Much?

🇰🇷 BACKGROUND

AI가 일상에 들어오면서 사람마다 쓰는 방식이 달라졌어요. 어떤 사람은 글쓰기, 번역, 일정 정리, 아이디어 만들기에 자주 쓰고, 어떤 사람은 아직 검색보다 불편하거나 믿기 어렵다고 느껴요. AI는 시간을 줄여주지만, 결과를 그대로 믿으면 실수가 생길 수 있고, 너무 자주 쓰면 내 판단이 흐려지는 느낌도 받을 수 있어요. 그래서 중요한 건 '많이 쓰는지'가 아니라, 어떤 일에는 도움을 받고 어떤 일에는 직접 생각할지 기준을 세우는 거예요.

📖 READ BEFORE WE TALK

AI is becoming part of normal life. People use it for small things: fixing messages, planning trips, summarizing long texts, translating, studying, or getting ideas. For some people, it already feels like a basic tool. For others, it still feels strange, hard to trust, or just not needed. The good thing is speed. But speed can also bring new risks if people stop checking facts or let the tool decide too much. AI works best when you know what kind of help you want. It can support your thinking, but it should not quietly take over your judgment. The real question is not 'Do you use AI?' It is 'Where does it really help you, and where do you still need to think for yourself?'

At work, AI can feel like an advantage. It helps people write, summarize, and learn faster. But it can also create pressure — when coworkers seem to use it better, or when your company expects everyone to change quickly. The real line is this: does AI lower your stress, or does it quietly raise the standard for everyone?
