

01 SMALL TALK

When was the last time you saw a doctor
— recently, or a long time ago?

Do you usually book appointments right
away, or do you put them off?

When you feel a little sick, do you rest at
home first, or go see a doctor?

02 POP QUIZ — DOES THIS SOUND NATURAL?

① ~~"My condition is not good today."~~

✓ "I'm not feeling well today. / I'm a bit under the weather."

몸 상태엔 condition을 잘 안 써요. condition은 기계·물건 느낌이라, 사람은 not feeling well이나 under the weather가 자연스러워요.

② ~~"I am on a diet from Monday."~~

✓ "I'm starting a diet on Monday."

미래에 시작하는 거면 from보다 starting on이 자연스러워요. 이미 하는 중이면 since Monday를 써요.

③ ~~"I want to make exercise habit."~~

✓ "I want to build an exercise habit."

습관은 make가 아니라 build나 form과 어울리고, 관사 an이 꼭 필요해요.

Health Checkups — Care Now or Keep Delaying?

🇰🇷 BACKGROUND

건강검진은 중요하다는 걸 알면서도 쉽게 미루게 되는 일이에요. 특별히 아픈 곳이 없으면 굳이 시간을 내야 하나 싶고, 결과가 안 좋을까 봐 불안해서 피하기도 해요. 하지만 검진은 문제가 생긴 뒤 병원에 가는 것과는 다른 종류의 관리예요. 내 몸 상태를 확인하는 작은 예약이지만, 바쁜 일상에서는 그 작은 예약을 잡는 것부터가 꽤 어려운 일이 돼요.

📖 READ BEFORE WE TALK

Health checkups are easy to delay because they feel important but not urgent. If nothing hurts, making an appointment can feel unnecessary. If something might be wrong, the checkup can feel scary. That is why many people put it off, even when they know prevention is better than waiting. A checkup is not only a medical task; it is also a mental one. It asks you to face uncertainty, make time, and treat your body as something worth checking before a problem becomes obvious. We often know the right answer but still find it hard to act. Health decisions get delayed because life feels busy and the results feel far away. The gap between knowing what is good and actually doing it grows wider when time, money, anxiety, and old habits get in the way.
