

01 SMALL TALK

Do you use ChatGPT or any AI app? How often — every day, sometimes, or almost never?

When you get a long message or report, do you read all of it or just skim it?

What's one small thing that made your day a little easier this week?

02 POP QUIZ — DOES THIS SOUND NATURAL?

① ~~"I will share you the file."~~

✓ "I'll send you the file. / I'll share the file with you."

'share you __'는 콩글리시예요. share는 'share something with someone'. 그냥 'send you the file'이 제일 자연스러워요.

② ~~"Let's meeting at 3 p.m."~~

✓ "Let's meet at 3 p.m."

meeting은 명사예요. 동사는 meet. '회의하자'는 Let's meet 또는 Let's have a meeting이라고 해요.

③ ~~"I did overwork last night."~~

✓ "I worked overtime last night."

'야근하다'는 work overtime 또는 work late예요. overwork는 '과로'라는 뜻이라 여기선 어색해요.

03 오늘의 원업

AI에게 말하기 가장 좋다고 생각하는 일 순서로 각자 1-4위 매기기. 1위만 말하고 짧게 이유. 다른 사람 의견 들으며 자기 순위 한 번 더 정리.

WARM-UP

Rank Them (5분)

1. Writing English emails for work
2. Summarizing a long report or article
3. Making the first draft of a presentation
4. Cleaning up messy meeting notes

WORK · MAIN DISCUSSION

AI at Work — Useful Edge or New Pressure?

🇰🇷 BACKGROUND

회사에서 AI를 잘 쓰는 사람은 이제 엑셀을 잘 다루는 사람처럼 조용히 앞서가는 느낌을 줄 수 있어요. 회의록 정리, 보고서 초안, 영어 메일, 자료 요약처럼 반복되는 일을 빠르게 처리하면 확실히 업무 감각이 좋아 보이죠. 하지만 AI를 많이 쓴다고 무조건 일을 잘하는 건 아니에요. 결과를 검토하지 않거나, 본인이 이해하지 못한 내용을 그대로 내면 오히려 신뢰가 떨어질 수 있어요. 그래서 핵심은 'AI를 쓰느냐'보다 어디까지 도움을 받고, 어디서부터 내 판단으로 책임지는지예요.

📖 READ BEFORE WE TALK

Using AI well at work can feel a little like being good at Excel: not flashy, but quietly powerful. It can help with meeting notes, first drafts, English emails, and other tasks that usually take a lot of time. But using AI does not always mean good work. If someone copies an answer without checking it, or cannot explain the result, the tool can hurt trust instead of building it. The real skill is knowing when AI is useful, how to check its output, and where human judgment still has to take responsibility. AI can feel like an advantage, but it can also create pressure when coworkers seem to use it better. The real question is whether AI reduces stress or quietly raises the standard for everyone.

💡 WORDS YOU MIGHT NEED

It saves me a lot of time. — 시간이 많이 절약돼요.

I always double-check it. — 항상 다시 확인해요.

It depends on the task. — 일에 따라 달라요.

I'd rather do it from scratch. — 차라리 처음부터 직접 할래요.

I'm still getting used to it. — 아직 익숙해지는 중이에요.

To be honest, ... — 솔직히 말하면...

🗣️ TRY THESE PHRASES

I'd say it's a real skill because ____.

The way I see it, ____.

Honestly, it's my fault — ____.

At the end of the day, ____ because ____.

⚡ EASY ENTRY

- 1 Are you more of an 'ask-AI-first' person or a 'figure-it-out-myself' person when a work task gets tricky?
- 2 When was the last time you used AI for something at work — an email, a summary, or a report draft? What was it?
- 3 Quick — pick one: at work, is AI more like your assistant, your teammate, or your secret cheat sheet?
- 4 On a scale of 1 to 5, how lost would you feel if AI tools were suddenly banned at your job tomorrow?

🗣️ MAIN DISCUSSION

Q1. Is using AI well at work a real skill, or just a shortcut?

↳ *I'd say it's a real skill because ____.*

↳ *The way I see it, ____.*

Q2. If you use AI to write a report and it has a mistake, whose fault is it — yours or the AI's?

↳ *Honestly, it's my fault — ____.*

↳ *At the end of the day, ____ because ____.*

Q3. Should you tell your boss or coworkers when you used AI? Why or why not?

↳ *In my case, I would tell them since ____.*

↳ *It depends on the situation, but usually ____.*

Q4. Does AI make work less stressful, or does it raise the standard for everyone?

↳ *Most of the time, ____ but ____.*

↳ *When I think about it, ____.*

Q5. What work task should always stay human, not done by AI?

↳ *If I had to choose, ____ should stay human because ____.*

↳ *One thing that should never change is ____.*
